

The Maccaes Book

CHAMBERS'S EDUCATIONAL COURSE—EDITED
BY W. AND R. CHAMBERS

CHEMISTRY

BY THE LATE

GEORGE WILSON, M.D., F.R.S.E.

PROFESSOR OF TECHNOLOGY IN THE UNIVERSITY OF EDINBURGH

Revised and Enlarged

BY STEVENSON MACADAM, PH.D., F.R.S.E., F.C.S.

LECTURER ON CHEMISTRY IN THE MEDICAL SCHOOL, SURGEONS' HALL,

AND TO THE SCHOOL OF ARTS, EDINBURGH;

AND PRESIDENT OF THE ROYAL SCOTTISH SOCIETY OF ARTS

WILLIAM AND ROBERT CHAMBERS
LONDON AND EDINBURGH

CONTENTS.

I.	PAGE
Introduction,	7
General Properties of Matter,	16
Weight—Specific Gravity—Atomic Weight,	20
Chemical Affinity,	24
Laws of Combining Proportion,	29
Atomic Theory,	39
Chemical Nomenclature,	45
Chemical Notation,	54
Law of Gaseous Volumes,	58
Heat and its Chemical Relations—	
Expansion,	64
The Thermometer,	66
Specific Heat,	69
Propagation of Heat—	
Conduction,	73
Convection,	74
Radiation,	77
Latent Heat—	
Heat of Liquidity,	78
Heat of Gasëity—Vaporisation,	82
Crystallisation and Crystallography,	87

II.	
Inorganic Chemistry,	91
Oxygen,	91
Hydrogen,	101
Nitrogen,	109
The Atmosphere,	111
Diffusion of Gases,	114
Compounds of Nitrogen and Oxygen—	
Nitric Acid,	118
Protoxide of Nitrogen,	121
Binoxide of Nitrogen,	123
Nitrous Acid—Hyponitric Acid,	125
Carbon,	126
Carbonic Acid,	128
Carbonic Oxide,	133

	PAGE
Compounds of Carbon and Hydrogen—	
Heavy Carburetted Hydrogen,	135
Light Carburetted Hydrogen,	137
Coal-Gas,	138
Davy-Lamp,	138
Structure of Flame,	142
The Blowpipe,	145
Boron—Boracic Acid,	147, 148
Silicon—Silica or Silicic Acid,	149, 150
Sulphur,	151
Sulphurous Acid,	153
Sulphuric Acid,	155
Sulphuretted Hydrogen,	158
Selenium,	161
Phosphorus,	162
Compounds of Phosphorus—	
Oxide of Phosphorus,	164
Hypophosphorous Acid,	164
Phosphorous Acid,	165
Phosphoric Acid,	166
Phosphuretted Hydrogen,	167
Chlorine,	169
Hydrochloric Acid,	174
Oxides of Chlorine,	176
Iodine,	180
Bromine,	185
Fluorine,	187
Theory of Acids and Salts,	191
Metallic Elements—	
General Observations,	194
General Properties of the Metals,	195
Chemical Relations of the Metals,	197
Divisions of the Metals into Classes,	199
Metals of the Alkalis,	200
Potassium,	200
Sodium,	205
Ammonium and other Compounds of Hydro- gen and Nitrogen,	208
Rare Metals allied to the Alkalis,	215
Metals of the Alkaline Earths—	
Calcium,	215
Magnesium,	219
Barium,	221
Strontium,	222
Metals of the Earths Proper—	
Aluminum or Aluminium,	225
Rare Metals allied to Aluminum,	230
Chromium,	230

Heavy Metals, or Metals Proper—	PAGE
I. Metals not Precipitable by Sulphuretted Hydrogen in Acid Solutions—	
Zinc,	232
Iron,	235
Manganese,	243
Cobalt and Nickel,	245
II. Metals Precipitable by Sulphuretted Hydrogen, whether their Solutions are Neutral, Acid, or Alkaline—	
Copper,	246
Lead,	248
Silver,	250
Mercury,	252
Bismuth—Cadmium,	256
III. Metals which give no Precipitate with Sulphuretted Hydrogen in Alkaline Solutions—	
Gold,	256
Platinum,	257
Tin,	258
Antimony,	259
Arsenic,	261
Rare Metals allied to the Heavy Metals or Metals Proper,	265

III.

Organic Chemistry,	267
Non-azotised or Amylaceous Principles of Food,	271
Starch,	272
Dextrin,	274
Gum,	276
Lignin; Cellulose,	277
Sugar,	279
Manna, Glycyrrhizin, &c.	283
Azotised or Albuminous Principles of food—	
Albumen—Fibrin and Casein,	284
Gelatinous Group of Substances—	
Gelatin and Chondrin,	287
Relation of the Amylaceous and Albuminous Constituents to the Sustenance of Animals—	
Nutrition—Respiration,	288
Products of the Action of the Albuminous on the Amylaceous Principles—Alcohol and its Derivatives,	290
Alcohol—Fermentation,	290
Methylated Spirit,	293
Lactic Acid Fermentation,	293
Butyric Acid Fermentation,	293
Viscous Fermentation,	294
Ether, and Compounds of Ethyl,	294
Acetic Acid, and Compounds of Acetyl,	298

	PAGE
Substances allied to Alcohol and its Derivatives,	302
Wood Alcohol and the Methyl Series,	302
Formic Acid, Chloroform, and the Formyl Series,	303
Propyl, Butyl, and Amyl Series,	304
Concluding Remarks on the Alcohols and their Derivatives—	
Mercaptan—Kakodyl—Compound Ethers,	306
Oils and Fats—	
Fixed Oils,	308
Volatile Oils,	311
Benzoyl, Salicyl, and Cinnamyl Series,	313
Vegetable Acids—	
Tartaric Acid,	315
Racemic or Paratartaric Acid,	316
Citric Acid,	317
Malic Acid,	317
Oxalic Acid,	318
Meconic Acid,	318
Quinic or Kinic Acid,	319
Tannic, Gallic, and Pyrogallie Acids,	319
Compound Salt-Radicals,	319
Cyanogen,	319
Hydrocyanic Acid,	321
Oxides of Cyanogen—Cyanic, Fulminic, and Cyanuric Acids,	323
Ferrocyanogen,	325
Ferridcyanogen,	326
Sulphocyanogen,	326
Nitro-prussides,	327
Vegetable Alkaloids or Alkalis—	
Coniine, Nicotine, and Caffeine,	328
Strychnia or Strychnine, and Brucine,	329
Morphia or Morphine,	329
Quina or Quinine,	331
Artificial Alkaloids,	331
Colouring Matters—	
Blue—Red—Yellow,	332
Coal-tar Colours,	333

IV.

Electro-Chemistry,	337
Gerhardt's Equivalents and Notation—	
The Unitary System,	349
Index,	353
